Layers

The modern window system with the smallest construction depth of the profile from the whole Esperia Life line. Wood and aluminum profile and the ability to use "thicker" glass allow the energy efficiency of this profile.

* The above value of U_w is given for a reference window with dimensions of 1230 x 1480 mm.

The colour palette presented on the Eko-Okna's website is for illustrative purposes only and cannot be a clear reference to the actual colours or wood grain. As the most reliable source of colours, we recommend the sample provided by our partner, Teknos.
